

## The Transportation Module

is a comprehensive tracking system for all your vehicles and maintenance schedules as well as bus route/bus stop design, and student bus route/bus stop assignments.

## Vehicle Maintenance

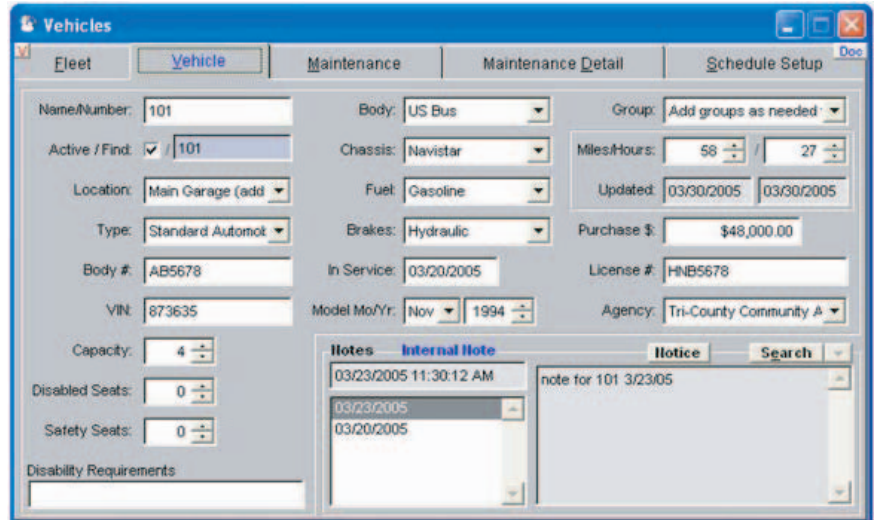

Design and apply an unlimited number of completely different preventative maintenance schedules separately to each vehicle. Schedule by date, hour meter time, mileage, fuel consumption, or by number of days, weekly, monthly, quarterly or annually. Create reports on cost per mile, labor cost, parts cost, gas mileage, oil consumption, tire wear and much more. Call up a complete maintenance history on any vehicle at any time. Capture any and all maintenance information from oil changes to engine overhauls. Keep detailed vehicle information.

## Bus Routes & Stops

Bus route/bus stop tracking and design. One-click mirroring of routes. Automatic calculation of drop-off and pick-up times. All entered bus stops are stored in memory for subsequent pick-list use in route design. Drag and drop bus stop re-ordering. Assign route times to individuals or groups of students with a single operation. Automatic assignment of return routes. Complete flexibility of pick-up and drop-off stops by day of the week.

## VEHICLES
