

## The Adult Daycare Module

provides agencies with a sophisticated tool to track and manage day care programs for adult clients and their families.

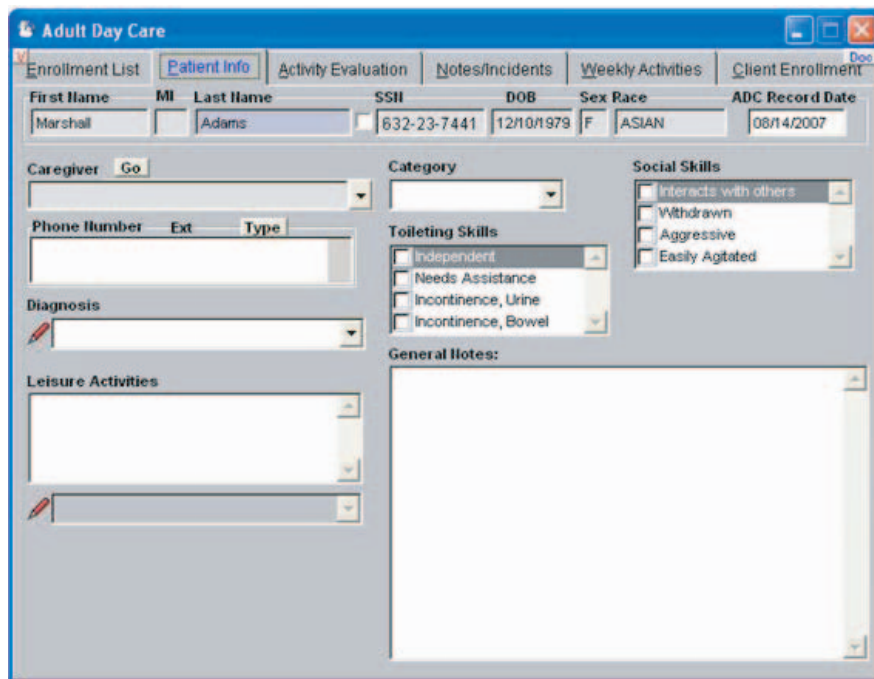

In addition to the extensive health, mental health and nutrition records available in the CSST base program, Adult Daycare offers detailed record keeping on medical and social issues unique to senior citizens and Alzheimer's patients. It schedules and tracks activities, meal delivery, attendance, activities and much, much more.

## Features

Complete patient information, social skills, toilet skills, leisure activities, diagnosis. Activity evaluation, notes and incident tracking; weekly activities recording by day and program; detailed client enrollment records. Integrated into the Adult Daycare Module is a daily attendance and meal delivery system that helps you keep your attendance and nutritional programs up to date as well as helping you to serve every patient's needs.
