

The Clients and Families Module

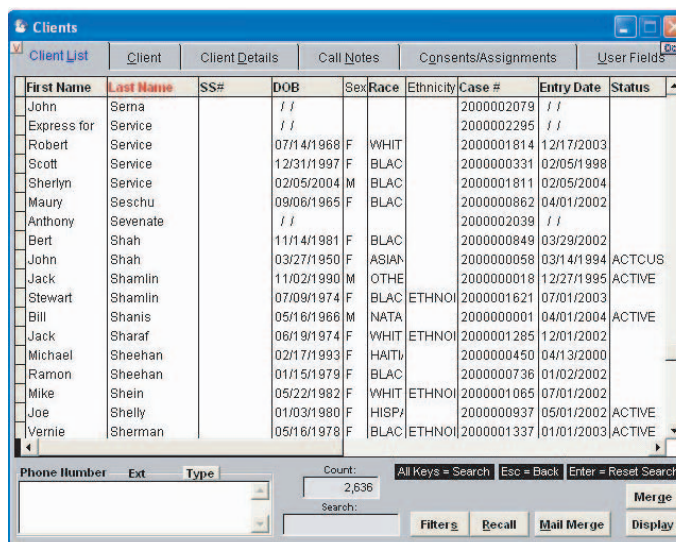

provides tracking of base demographic data: family position and related family members, language skill and precedence, emergency contact information, correspondence, consents, document management, and automatic program eligibility checking.

Improve Client Services and Accuracy:

Enter a client once - share data with every authorized department, and update as needed. No more entering basic client data for every program.

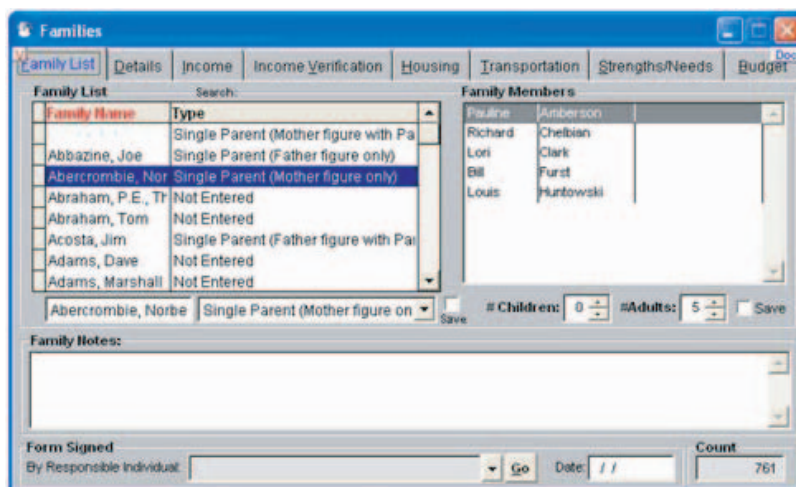

- Track every aspect of your clients and their families.
- Share basic data with every department.
- Prevent duplicate client entry and duplicate services.
- Know the number of clients served by each department.
- Know the number of clients on waiting lists, denied, or out of services.
- Perform internal referrals and transfers.
- Maintain accountability.
- Fulfill CSBG and ROMA requirements.

CLIENT FORM

First Name	Last Name	SS#	DOB	Sex	Race	Ethnicity	Case #	Entry Date	Status
