

The Head Start Module

represents a dramatic leap in complete client tracking and data collection. It provides an unparalleled user-friendly interface, secure data sharing across your agency and powerful reporting capabilities that let administrators look at each class, a center or the entire program with the click of a button.

Head Start and More...

With the CSST Head Start Module in place, you will now have automatic program eligibility checking to help determine for which programs your clients are eligible. Also included are CSBG and ROMA, staff and volunteer tracking, in-kind or donations, education, training, health services, timesheets, transitions, powerful reporting (PIR) and robust appointment and scheduling capability.

The CSST Difference

The Head Start Module provides users and administrators a way to efficiently manage their programs. It records all required data and includes the ability to automatically check for other program eligibilities, prevent duplicate service delivery and enroll clients in supporting programs. CSST tracks the client and their family through your programs and meets each client's needs without duplicate entries.

This module requires:

- Health, Education & Jobs Module
- Service Delivery Module
